Summary

Senior Platform Engineer with 10 years across IT infrastructure and Identity & Access Management (IAM), specialising in SailPoint IdentityIQ. Leads CI/CD modernisation, large-scale vulnerability reduction and automation across production and non-production environments, and keeps identity data accurate for downstream systems and leadership dashboards.

Skills

SailPoint, Windows, Linux, ServiceNow, MySQL, AppDynamics, Splunk, GitHub, GitHub Actions, Octopus, Confluence, JIRA, Zephyr, Claude, Codex, AI automation

Work Experience

Commonwealth Bank of Australia | Jan 2022 – Present

Senior Platform Engineer | Feb 2026 – Present

- Led the migration of the SailPoint CI/CD pipeline from TeamCity to GitHub Actions across 8 repositories, reducing build time by 70%
- Helped reduce 5,000+ vulnerabilities across 120 servers in all SailPoint production and non-production environments
- Built automation via the CI/CD pipeline to remediate the HTTPS header vulnerability in Tomcat
- Enhanced the Joiner-Mover-Leaver (JML) process by enabling attribute sync between the authoritative source and critical downstream systems such as AD and LDAP
- Enabled automated extraction of SailPoint data from the IdentityIQ database so enterprise data products can build identity dashboards for leadership
- Built Claude and Codex skills that automate Jira ticket creation and updates, Confluence documentation writing and editing, and Zephyr test case writing

Cyber Operations Engineer | Jan 2022 – Jan 2026

- Handling SailPoint incidents, service requests and running IAM MERT activities
- Creating SQL queries for extracting custom reports for the business
- Certification renewal activities for IIQ UI servers, IQ Service servers and RACF Connector Gateway servers for all environments
- Monitoring regular server health checks via AppDynamics
- Identifying and raising problem tickets with IAM developers/vendors and following up for closure
- Managing secrets for all application integrations from the SailPoint side
- Participated in the SailPoint upgrade from 8.1 to 8.3P3
- Application onboarding, enhancements and platform build deployments via CI/CD pipeline
- Approving and merging GitHub branches after deployment

IAM L2 Analyst, SailPoint – HCL Technologies | Jan 2019 – Jan 2022

- Monitoring daily failures (LCM, Task)
- Writing test steps for enhancements and application onboarding
- Testing new applications and documenting through HP-ALM
- Manual testing and documenting of enhancements for Jira items
- Creation of workgroups and roles, and testing in UAT
- Data validation after onboarding applications

System Administrator – Tata Consultancy Services | Jul 2016 – Dec 2018

- Identified, reported, coordinated and resolved network security and server issues
- Coordinated with Server, Network, Firewall and Antivirus teams after identifying root cause of issues, and resolved them
- L1 support for all desktop and printer issues, supporting approx. 40,000 employees at the TCS Chennai location

Education

Bachelor of Computer Application – Nehru Group of Institutions, Coimbatore | May 2016

Certifications

- SailPoint Certified IIQ Associate
- AWS Certified Cloud Practitioner
